

Business Continuity & Resilience Statement June 2026

WRUK Ltd t/a Workshop Recruitment is committed to maintaining reliable and resilient services for our clients, candidates and temporary workers.

We maintain a Business Continuity and Disaster Recovery framework designed to minimise disruption and support the continuation and recovery of critical business operations following an unexpected incident.

Our business operates using secure, cloud-based systems, enabling authorised employees to access essential services and continue operations remotely where required. Our critical recruitment, communication and business systems are supported by specialist third-party technology providers.

Our continuity arrangements consider a range of potential disruptions, including loss of access to our premises, internet or telecommunications failure, technology outages, cyber incidents, data loss and significant supplier disruption.

We maintain managed backup and recovery arrangements for critical business information and periodically review and test recovery arrangements with our technology partners.

Business continuity arrangements are reviewed regularly and following significant changes to our systems, suppliers or business operations.

Further information regarding our Business Continuity and Disaster Recovery arrangements can be provided to clients as part of supplier due diligence or tender processes where appropriate.
